Welcome to OWASP Juice Shop!
Being a web application with a vast number of intended security vulnerabilities, the OWASP Juice Shop is supposed to be the opposite of a best practice or template application for web developers: It is an awareness, training, demonstration and exercise tool for security risks in modern web applications. The OWASP Juice Shop is an open-source project hosted by the non-profit Open Worldwide Application Security Project (OWASP) and is developed and maintained by volunteers. Check out the link below for more information and documentation on the project.
